Experience

Full Stack Developer   **June 2024 - Present**

ANS IT India - Full Time

- Developed a comprehensive ERP system using the MERN stack, featuring modules like HRMS, task management, project management, employee management, live tracking, and warehouse management to streamline company operations.
- Designed and implemented the full frontend using Tailwind CSS, Bootstrap, and Shadcn UI, ensuring a responsive and intuitive user experience.
- Built backend functionalities for project management, task management, HRMS, and warehouse management using Node.js, Prisma, and Zod for validation.
- Created the company's official website and admin panel using the MERN stack, enabling efficient content management and updates.

Projects

ERP System Development

Designed and developed a full-featured ERP system using the MERN stack, including:
- Warehouse Management: Built frontend and backend to manage inventory, stock tracking.
- HRMS: Created employee management and payroll functionalities.
- Task & Project Management: Developed tools for task assignment and project tracking.

Personal Portfolio

- Developed a dynamic personal portfolio website using Next.js, TypeScript, Prisma, and MongoDB.
- Implemented a responsive frontend with Next.js and integrated a backend with Prisma and MongoDB for efficient data management and storage.

Sneat (Admin Panel)

- Developed a robust admin panel using Node.js, Mongoose, JWT, EJS, and JavaScript to manage user roles and permissions.
- Implemented CRUD operations, secure user authentication with JWT, and a responsive design for seamless usability across devices.

Education
